

We propose to have the following tokens added to GLP to provide more options for traders and to increase the swap volume that can be routed through GLP.

New tokens should be given a small weightage of 2% to start with and adjusted with utilization. For stablecoin tokens in Avalanche they can be given a 5% weightage.

Arbitrum:

- AAVE
- CRV
- YFI

Avalanche:

- AAVE
- YFI
- LINK
- DAI
- USDT
