

We're excited to announce that as part of the passed [Ethereum Protocol Attackathon Sponsorship](#), Arbitrum DAO has two [Devcon 2024](#) tickets to give away to its community members! The Ethereum Foundation and ImmuneFi have given Entropy Advisors permission to run the process in order to allocate these tickets to the community in a fair and swift manner. The event is quickly approaching [NOV 12 - 15] in Bangkok.

Who can participate?

Any Arbitrum contributor who has been active on the forum for more than 1 week is eligible.

How do I participate?

Simply reply to this thread stating that you want to participate in the giveaway. Applications will start immediately and run until 4 PM EST on Friday Nov 1.

Selection process

Each applicant will be added to a spreadsheet in the order in which they apply and assigned a chronological number. Two numbers between 1 - and the number assigned to the final applicant will be selected via <https://www.random.org/>. The choice of platform for random # generation is largely due to the time constraints in needing to get this done quickly. The results will be announced this Friday at 5 PM EST under this thread. Winners have 72 hours to claim their tickets. The selection process will be recorded and posted for transparency.

Winners only require a valid email to send to the Ethereum Foundation in order to claim tickets.

Good luck~
