

AA30 paymaster not deployed

The first 20 bytes of the `paymasterAndData` field specify the address of the paymaster contract you are requesting to use.

The paymaster contract is not deployed.

Possible solutions

- Verify that the `paymasterAndData`
- field is correct, and that the first 20 bytes are the address of the paymaster contract you intend to use.
- Verify that the paymaster contract is deployed on the network you are using.
