

Uniswap liquidity has already dropped by nearly 40% according to DeFi Pulse.

As Uniswap dominance quickly dwindles, are you prepared to vote to simply continue the UNI incentives we've had since v2 launch (not halving it, but spending another 20m UNI out of the total 172 UNI Year 1 vesting) for 2 more months while we research our long-term strategy?

- Yes, let's extend the same incentives 2 months
- No, let's do something else (or take no action)
