

Hi,

I really like this project and am in the process of trying to get some SCRT into my Keplr wallet. For my test transaction on the bridge it took about 45 minutes to appear. My next transaction was done about 3 hours ago and still hasn't appeared in the wallet. This seems a bit long for 6 network confirmations?

I paid the small fee to be able to see my SCRT and can see the small amount I sent over as a test. I just can't see the second transaction even though it all appears to have been completed successfully.

Thanks.
