

Hi team, I hope everyone is well!

Following the proposal made by [@Ivan_Protofire](#) ([Safe \(ex. Gnosis Safe\) deployment on Holesky](#)), we are moving forward with our first Quarter for Support and Maintenance, where we will continue integrating new features, providing technical support, and, of course, monitoring/optimizing infrastructure while keeping our Safe instance as up-to-date and close to Safe Global as possible.

The budget request is \$6,000 in DAI, and our estimate is to distribute it as follows:

- 50% for support and maintenance services.
- 50% to cover infrastructure costs.

I am maintaining the initial wallet address here. Address on ETH network:

0x63d6287D5b853cCfedbA1247fBEb9a40512F709A

Also:

- Holesky Safe: <https://holesky-safe.protofire.io>
- Spending Limit Module & EIP-1271 on Chain Feature: [Holesky Safe - New Features - Dec 12/23](#)

Cheers!
