

My fellow apes, this is an unfinished thought and i dont think i can ever finish it...

because I do not understand enough about how tokenomics and how minting NFTs work and the effects it has on the ecosystem/metaverse.

Please entertain me if you have time.

What do you think about minting new NFTs with Apecoin?

This will take away from the total supply of Apecoin. (Increasing the value of Apecoin)

This gives you a chance to be a club member and get benefits (whatever that may be).

And maybe... after every mint, the cost to mint also increases.

Don't be afraid to shut me down. I just want a logical reason behind it. Together Ape Strong.
