

Automate (Legacy)

Reliable, developer-friendly & decentralized smart contract automation Deprecation Notice: Gelato Functions is set to replace Automate, providing enhanced automation capabilities, access to off-chain data, unified payments across networks, and a performance boost. [Migrate your tasks](#) to Gelato Functions before Legacy Automate's end of life on June 30th, 2024 for uninterrupted service.

Quick Start

New to smart contract automation? To quickly understand the process and how Gelato Automate enables you to automate a contract yourself, we recommend running through the [Tutorial](#) . Gelato Automate provides an intuitive, self-service app for you to create and manage your automation tasks. Before diving we recommend you:

1. Check we [support the network](#)
2. the contract you want to automate is on
3. Does your task match the [types of tasks that can be automated](#)
4. ?
5. What is going to trigger your task? Is it based on a time frequency? If so Gelato Automate already has you covered. If it is based on more complex conditions (for example, when the yield to harvest exceeds the costs of doing so) then you'll need to consider [writing a resolver](#)
6. .
7. What arguments does your task require? Are they static or do they also need to be provided from your resolver?
- 8.

With this information you should be good to go through the same Tutorial steps to automate your your real-world contract. The [Template real-world examples](#) may also be useful for you.

If you hit any problems or have any questions, please do [reach out to the team](#) and we'll be happy to help you.
