Orbit Catalyst Programme: Framework for Supporting the Short-term Adoption of the Orbit Rollup Stack

With the introduction of the Orbit rollup stack the DAO can alleviate friction points for builders looking to start and grow L2 or L3 ecosystems. Moreover, with consideration that when an Orbit rollup is deployed 10% of the sequencer fees is returned to the Arbitrum DAO (8% to the DAO and 2% to the developer guild) there is the likelihood of long-term value capture for the DAO should short-term adoption be supported.
