

Thank you!

A huge thank you is due to citizens for their continued dedication to experimentation and iteration of Retroactive Public Goods Funding (Retro Funding). In round 3, the Collective rewarded more than 500 builders with 30m OP tokens for their impact to Optimism.

Citizens dedicated more than 30 hours on average to voting in Retro Funding 3, more than 40 citizens volunteered to [review over 1000 reported applications for application rule violations](#) and collectively citizens submitted more than 10,000 votes in Retro Funding 3.

Retroactive Rewards for participation in Retro Funding

The Optimism Collective rewards Token House delegates and citizens retroactively. Retroactive rewards are a core pillar of the large scale experiment to establish a new, regenerative economic system within the Collective. Feedback on retro citizen rewards is extremely helpful in refining what will be the primary reward mechanism in the Collective.

Consistent with the [retro governance rewards framework](#), the below criteria recognise contributions of citizens to Retro Funding 3.

Criteria

Definition

Reasoning

OP

Participated in RetroPGF 3

Citizen has voted on 58 applications or more.

Broad citizen participation in RetroPGF is critical to its success. While badgeholders were not expected to vote on a minimum number of applications, badgeholders that fall within the top 70% of participants (as measured by number of applications voted on) are rewarded for their efforts.

2,000 OP per eligible citizen

Volunteered to participate as a reviewer or lead reviewer in the Application Review Process

Citizen has participated in the application review process.

The application review process was key to ensuring only eligible applications proceed into the Retro Funding voting process.

20,000 OP will be divided among reviewers based on the number of applications reviewed. Additionally, the lead reviewer, which did not participate in reviewing individual applications, is rewarded 30% more than the highest rewarded reviewer to reflect the outsized responsibilities and workload of the lead reviewer.

Created a useful List

Each List is rewarded for its usefulness based on available data. Lists are rewarded points based on number of citizen interactions (e.g. events triggered) and number of citizen likes received (citizens could like a list to signal its quality to other citizens). Points were given as follows: List has ≥ 5 citizen events = 1 point, List has ≥ 10 citizen events & ≥ 2 citizen likes = 2 points, List has ≥ 20 citizen events & ≥ 4 citizen likes = 4 points, List has ≥ 40 badgeholder events & ≥ 8 citizen likes = 8 points, List has ≥ 40 badgeholder events & ≥ 16 citizen likes = 16 points

Lists were a core part of RetroPGF 3, allowing citizen to leverage the expertise of other badgeholders when casting their own votes.

40k OP to be split among qualifying list makers based on the number of points.

Disclosed Conflicts of Interest

Citizen has disclosed their conflicts of interest on the forum

Disclosing possible conflicts of interests is core to maintaining the transparency and legitimacy of the Retro Funding process

100 OP per eligible citizen

You can find a spreadsheet with more details on the allocation of rewards [here](#).

Consistent with other grant allocations, all citizen rewards will be subject to a KYC and claims flow process. This round of retroactive citizen rewards will be allocated from the "Unallocated" portion of the Ecosystem Fund, not the Governance or

Retroactive Public Goods Funding Token allocation.

Citizens will be contacted via email on the 11th of March
with instructions on how to claim their rewards.
