

Update your existing app to sponsor gas fees for smart account users

If you are looking to sponsor gas fees for your users without embedding a wallet in your app, you can use this guide to update your existing app to sponsor gas fees for smart accounts.

Steps

Spin up an ERC-7677 proxy server

Follow the deployment guide on the [ERC-7677 Proxy Server](#) repository readme to deploy an ERC-7677 proxy server.

Update your app to sponsor gas fees

Follow Step 3 on the [erc7677.xyz guide](#) to update your app to support EIP-5792 requests and enable the paymaster service capability feature, using the public URL you created for the ERC-7677 proxy in the previous step.
