

Project Name:

DefiLlama

Author Name:

0xngmi

Defillama TVL (at snapshot):

0 (not a protocol)

Transactons/day (at snapshot):

0 (not a protocol)

Tier:

None

Optimism native:

No

Number of OP tokens to claim:

500k (no idea about this number since there's no guidance, feel free to change it to any number you want)

L2

Recipient Address:

0x08a3c2A819E3de7ACa384c798269B3Ce1CD0e437

Proposal for token distribution (under 1000 words):

How will the OP tokens be distributed?

They will be used to cover defillama costs.

How will this distribution incentivize usage and liquidity on Optimism?

It won't, but it will fund a public good.

Proposal

The one and only benefit for optimism is that you'll fund a public good and that defillama is helpful for people looking to get analytics on optimism.

We believe that it's important that we stay completely neutral, so we will strictly not offer any benefits to optimism for this grant. We won't prioritize anything related to optimism due to this grant and we will treat optimism exactly the same whether this grant gets accepted or not.

In other words, we are asking for a donation. We believe that our previous work speaks for itself and since we are neutrality maxis we don't want to go into any deal that would bias us.

Atm we currently run entirely out of donations.
