

AITA Because I believe that there is some serious upside to \$APE?

I see a lot of folks who feel that the token is doomed to fail because of (from what I read) a depleted, or near depleted treasury.

But I see a TON of things on the horizon that would lift us up, including:

- The BB which appears to be very strict in what projects they are funding.
- Other projects outside of BB building on ApeChain.
- Yuga ensuring that games will be built on ApeChain.
- Memecoins (love em, or hate em) are going to be a thing.
- \$APE being used as gas and (as I understand it) those funds coming back to the DAO.

Part of me wants to liquidate everything and put it all in \$APE because I feel so bullish.

But AITA because I believe in the future of ApeChain and \$APE?
