

It's been a year since DopeWars was awarded [a grant](#). I have not seen a game on Optimism yet as they promised so I think its a fair question to ask what is happening here?

I have found concerning transactions that would indicate that they have sold a massive amount of OP tokens violating the no-sale rule that was in place [before their grant](#). More concerningly the projects most recent tweets shows they made a game on another ecosystem. Is OP being dumped to fund their game on [Starknet](#)?

Here are the concerning transactions.

Grant receipient wallet: [GnosisSafeProxy | Address 0x90103beDCfbE1eeE44ded89cEd88bA8503580b3D | OP Mainnet](#)

Most recent TX sends 84,616 OP to [new wallet](#)

New wallet sends tokens to [Bybit to be dumped](#)

Please see for yourself.
