

A SNAC proposal for advertising/marketing pretty cheaply on jungle tv;

JungleTV is a video sharing website by the Banano community. Banano is a feeless instant cryptocurrency. It has an average viewership of about 600 people currently, and they'll all be interested in crypto so it's a perfect marketing platform. It usually costs about 10-20 banano to queue a video, so only 10-20c atm.

So, it could be a good initiative to gather some of the best youtube vids on SCRT and start advertising on there.
