

This is DeFiance Capital.

One of our wallet address was recently compromised.

I am proposing that the Lido DAO freezes the vesting on this address: 0x48Acf41D10a063f9A6B718B9AAAd2e2fF5B319Ca2

Freezing the vesting will allow us to figure out a long-term solution to securing these funds and prevent the hacker from stealing and market-selling Lido for ETH or USD as it vests.

Signed message from compromised address:
