

# Testnet

Canto migrated to a new testnet network with chain ID 7701 (previously 740) in March 2023. Information about the new testnet is provided below. Canto has a testnet network for development and testing purposes. To connect to and explore the testnet, use these details:

Network Name: Canto TestnetNew RPC URL: <https://canto-testnet.plexnode.wtf> Chain ID: 7701Currency Symbol: CANTOBlock Explorer URL: <https://testnet.tuber.build/> Alternative Explorer URL: <https://canto-test.dex.guru/>

## Faucet

A testnet faucet at <https://www.cantofaucet.com/> dispenses 50 tokens per address per 24 hours.

Alternatively, use the `/driptestnet {address}` command in the `#canto-testnet-faucet` channel of the [Canto Discord](#).

**Discord Faucet Instructions** To use the faucet, locate the `#canto-testnet-faucet` channel in the Canto Discord. In this channel, begin typing `/driptestnet` into the chat bar. When you see the command appear above the chat bar, hit enter and paste in your wallet address. Finally, hit enter once more to send the command.

## Free Public Infrastructure

Canto's Free Public Infrastructure primitives, including the Canto DEX and Lending Market, are deployed to Canto testnet. Contract addresses can be found [here](#).

## Contract Secured Revenue

[Contract Secured Revenue \(CSR\)](#) is enabled on Canto testnet. Turnstile is deployed at the same address as on mainnet i.e. `0xEcf044C5B4b867CFda001101c617eCd347095B44`.
