

I did a quick search, but has there been discussion about integrating Warm Wallet into snapshot voting? If I missed this conversation, can someone share a link?

If not, is this something that would be easy to implement? Personally, I think it would make it easier for us to vote that maintain multiple wallets and be able to select a single wallet to do all of your voting.

Thanks in advance,

Proposals submitted to the AIP Ideas category can be vague, incomplete ideas. Topics submitted here are not required to be submitted as a formal AIP Draft Template, however, you may still use the [template](#) if you wish.
