

as mentioned in the docs [GMX Token | GMX Docs](#) the floor price fund currently holds GLP tokens, this was minted when GMX v1 was initially launched to help with liquidity

these funds could similarly be used to help with liquidity in v2, proposing to swap the GLP tokens to add liquidity to the v2 pools in which the current liquidity may make larger trades difficult:

1. DOGE (Arbitrum)
2. XRP (Arbitrum)
3. LTC (Arbitrum)
4. SOL (Arbitrum)
5. USDC-DAI (Arbitrum)
6. AVAX (Avalanche)
7. BTC (Avalanche)
8. ETH (Avalanche)
9. SOL (Avalanche)
10. DOGE (Avalanche)
11. LTC (Avalanche)

there is currently ~971,096 USD worth of GLP in the Floor Price Fund [TokenManager | Address 0x4E29d2ee6973E5Bd093df40ef9d0B28BD56C9e4E | Arbiscan](#)

this could be split evenly among the 11 pools which would lead to an increase of \$88,281.45 for each pool
