

Hello,

I currently run a shopify store that accepts a few forms of crypto via Coinbase Commerce and Coin Payments. I would love the opportunity to allow payments with \$APE. I believe it would be accepted by majority of online/e-commerce businesses currently dabbling in the web3.

I did notice that the upcoming BAYC merch drop will be via coinbase commerce and understand if its exclusive only to the collection, but If not, I would love some info on when it would be available for other merchants.

This is a link to add a coin onto coinpayments:[CoinPayments Add a Coin](#)

Please delete if necessary, Thanks!
