

The Manifold slot missed rate you note is attributed to the relay suffering an exploit in October 2022.

In total, 183

blocks have been submitted with the wrong reward.

Total amount of block rewards that have not been delivered to the block proposers is 7.472492260431932751

ETH.

3

different block builders have been used to submit those blocks:

0x8cc02635...a346263a1f: 109

0xa095ee16...c23309e8c4: 58

0x973377ac...de4c19574a: 16

Apart from the monetary damage, this was a huge reputation loss for us, and saw the removal of the relay as being a must include in Lido.

I do wonder if the ETH from the address 0x5caf7c1b096cf684b09ece3d3a142db0d46fc58e

will ever be moved. If not, the aim of the unknown block builder was definitely only the reputation damage for Manifold. I mean just look: <https://etherscan.io/address/0x5caf7c1b096cf684b09ece3d3a142db0d46fc58e#mine>
