

I hope you will support this idea.

If you hold minimum 400 amount of UNI tokens in your wallet and PARTICIPATE in any mining pool.

You will receive a small % MORE UNI from the liquidity mining pools.

This is an incentive to hold UNI token and get some extra rewards if you have more tokens.

I would say that a minimum threshold for this bonus would be: 400 UNI

Possible maximum whale cap at: 10,000 UNI

I love to hear your thoughts on this UNI BOOST
