

We need to setup a conflict of interest notification page.

This page will allow members to disclose their relationship to AIPs and their members before the AIPs are put up for discussion or votes.

Doing so could help us do away with the need for an OVERSIGHT TEAM.

Example, a member of the Special Council is involved in a communications team creating an AIP, they report this fact, their relationship or involvement in the AIP and/or its team. This then allows every DAO member to be aware of these facts but also, if lets say it was not disclosed beforehand, we could also call this out. Win, win.

Just a simple page setup maybe within discourse, announced on our main apecoin twitter feed or within discord [if we get one] etc etc, for example: APE X is a member of the newsletter team and is TEAM LEADER in AIP xxx. Simple. clear, to the point, and helps us stop collusion, abuse of power, call out bias, maintain impartiality and most importantly help us all trust that conflicts of interest are in the open and we can all observe and know what's really going on.

Also consider carrying this task out retrospectively on all grants awarded.
