

Acting as the Stability Facilitator under [MIP16](#), the Ecosystem Team is approving a poll to configure the Andromeda and Clydesdale Allocator Vaults for servicing increased demand.

This poll is to reactivate the Clydesdale DC-IAM and raise the line of both Andromeda and Clydesdale vaults.

Clydesdale RWA007-A

- reactivate DC-IAM
- set DC-IAM gap

to 50M

- set DC-IAM ttl

to 86400 (24 hours)

- set DC-IAM line

to 3B

Andromeda RWA015-A

- set DC-IAM line

to 3B

This action is only a technical configuration of these Allocator Vaults. Allocator Vaults remain bound and subject to the Stability Scope and the Stability [ALM Tier 2 rules](#), which limits Tier 2 collateral type to 78% of the AllocatorDAOs collateral portfolio.

Following a positive outcome of this poll, these parameters will be included in the next available executive vote.
