

I want to make everyone aware that Aave onchain governance is live on Tally!

You can use Tally to:

- Research Aave delegates
- Delegate the voting power of your Aave tokens
- Monitor the progress of proposals & analyze voting results
- Vote on proposals
- Create proposals

Tally is the most popular user interface for onchain governance. We are the preferred onchain governance solution for many of the large DAOs within the Ethereum ecosystem such as Arbitrum, Uniswap, Gitcoin, ENS, Compound, and Hop.

I included a couple of screenshots below to give you a sense of what you can expect from Tally's user interface.
