

I wanted to make this post before the Dharma proposal, I won't be taking part of the Uniswap governance anymore.

I have nothing against Navad, Brendan, Chris, Hiturunk, Dharma or the Uniswap team, and I think governance of Uniswap is not broken, and keep working just fine.

But at the end of the day this project belongs to the Uniswap team, and judging by the few interactions I had with them... whatever I am trying to do is not being welcomed, and I couldn't be more uncomfortable with that.

I wouldn't want someone insisting on taking part of my project if I don't like what they are doing either, so I think is best if that I take a step to the side.

I will keep working on my things and projects, some of them are Uniswap integrations... luckily for me I can interact with Uniswap without having to participate on this governance process hehe.

I have two addresses as delegate

0x00000583Cf2C6aA7488471fbe12ac7f0DfeB1cDa 0x47701463ee3a42fb87d24746fb9d8b70f06e6e3a

I suggest everyone who delegated to me to change their delegate, I am going to be abstaining from voting on all future proposals.

Good luck everyone!
