

Hello Secret Community,

With the upcoming launch of ShadeX – Shade Protocol's Money Market

, we are requesting a network parameter adjustment to facilitate deploying our contracts to mainnet.

Proposed Parameter Change

- Current:

compile_cost = 0.8

- Proposed:

compile_cost = 0.4

This adjustment will allow us to deploy contracts on-chain with the existing block gas constraints. A similar proposal was successfully implemented on testnet without any notable issues:

Testnet Reference:

[Proposal #46](#)

Proposal Details

```
{ "messages": [ { "@type": "/secret.compute.v1beta1.MsgUpdateParams", "authority": "TBD", "params": { "compile_cost": "0.400000000000000000", "max_contract_size": "2097152" } } ], "metadata": { "ipfs://CID", "deposit": "1000000susrc", "title": "Update Compile Cost Parameter For ShadeX Launch", "summary": "Lower compile cost to facilitate contract deployment.", "expedited": false }
```

We appreciate the community's support and look forward to advancing ShadeX on Secret Network.

Best,

Mo

Shade Protocol
