

## Simple Summary

Add a disclaimer to the borrower user interface, notifying users that governance can change parameter values which may alter their account health.

## Motivation

The governance process results in parameter changes of numerous kinds, including changes that impact account health factors. For example, the community has recently aligned on a [Risk-Off Framework](#) regarding reducing liquidation thresholds.

One way to increase transparency for Aave users is by adding a disclaimer in the borrow user interface. Since not all users may be aware that there is a governance process to change parameters or of the potential impact of governance decisions, it is valuable to make this information salient. Without this disclaimer, a user might believe that only price fluctuations impact their account health.

## Specification

Below is a mock-up of what the disclaimer would look like. Font size, design, and other details may be adjusted.

### Content

Attention: Parameter changes via governance can alter your account health factor and risk of liquidation. Follow the Aave governance forum [\[link\]](#) for updates.

### Placement

## Next Steps

- Targeting a Snapshot vote on 8/6 to garner community feedback on whether a disclaimer should be added.
