

I got this error when trying to send tokens (uscrt) using cosmJs sdk's stargate client.

Error: Broadcasting transaction failed with code 8 (codespace: sdk). Log: pubKey does not match signer address secret13u3a5t44aqd3j3dn4hn3rt0kljr7c4t2eg55qe with signer index: 0: invalid pubkey

My code snippet:

```
const cosmos_client = await SigningStargateClient.connectWithSigner(
  rpcEndpoint,
  wallet,
);

const result = await cosmos_client.sendTokens(
  'secret13u3a5t44aqd3j3dn4hn3rt0kljr7c4t2eg55qe',
  recipient,
  [{denom: 'uscrt', amount: '300000'}],
  {
    amount: [{denom: 'uscrt', amount: '2500'}],
    gas: '200000',
  },
);
```
