

Types and interfaces

List of important types.

...

Copy type SessionParameters = { allowedMethods: Array<{ contract: string; selector: string; }>; validityDays?: number; };

...

...

Copy type ConnectResponse = { account: SessionAccountInterface; initData?: InitDataParsed; callbackData?: string; };

...

...

Copy interface SessionAccountInterface extends AccountInterface { isDeployed(): Promise; getDeploymentPayload(): Promise; getOutsideExecutionPayload({ calls }: { calls: Call[] }): Promise; getSessionStatus(): SessionStatus; // "VALID" | "EXPIRED" | "INVALID_SCOPE" }

...

...

Copy interface ArgentTMAInterface { provider: ProviderInterface; sessionAccount?: SessionAccountInterface; connect(): Promise; requestConnection(callbackData: string): Promise; isConnected(): boolean; exportSignedSession(): Promise; clearSession(): Promise; }

...

...

Copy type ArgentTMASession = { version: number; privateKey: string; publicKey: string; sessionInfo: OffChainSession; deploymentPayload?: AccountDeploymentPayload; signature?: Signature; address?: string; };

...
