

Hi all, [Honn](#) from the Uniswap Foundation here. We are excited to share updates on the Uniswap Optimism (OP) [Protocol Delegation Program](#). This season's Committee has been finalized, welcoming Jeremy Guzman from the [community self-nomination process](#).

Final Committee:

- [Cameron ODonnell](#) & [Erikson Herman](#) (ConsenSys)
- [Charlie Feng](#) (Agora)
- [Brian Park](#) & [StrategicReserve](#) (Gamma Strategies)
- [Jeremy Guzman](#) (Mass Adoption)

The Committee plans to do the following:

- (1) conduct research and form a unified opinion
- (2) attend all community calls and events
- (3) collaborate to establish voting communication
- (4) post on the Uniswap forum for feedback 5-7 days before casting the final on-chain vote

Cycle 11's vote is scheduled to commence this Thursday, March 23rd

, and OP Governance responsibilities have changed in this cycle. The Token House

will no longer vote on grants, as this duty has transitioned to a [Council framework](#). However, the sole vote of this cycle carries significant weight for the network: [The Bedrock Upgrade](#).

The Committee will share their voting rationale on Discourse under the username: [@opdelegatescommittee](#). Stay tuned for further updates from the Committee.
