

Good morning,

I would like to share my thoughts on a topic I saw the started with good intention then went left fast.

Education on this coin- I set out to learn as much as I could about BAYC,MAYC and then the coin, I bought this coin at the onset and set out to find the group associated with the coin. Let's chart 4 days-yes 4

1. I couldn't find your link easily- their is a hack/mimic of it in green with weird links
2. I couldn't get CB to acknowledge that I had coins in the wallet
3. I couldn't get your website to see I had coins
4. I couldn't get Metmask to see the coins

now about ApeCoin

1. The big big reveal on Opensea accepting the coin was blah
2. How to use it and use it to do what? Hidden
3. Stopping the notion that it is a meme coin- certainly not-this cost me dinner with my broker (if I can pay for dinner collectively we can do better education content that can easily be updated)

This entire process took 4 days of coming home from the office and I still couldn't link properly. Then I passed it to my executive assistant and she finally got it done last night. WOW

All that to say please create some better educational content on this coin, get the word out there about what the coin is for. All these high powered names and talk about being elite okay great my amex black is elite along with platinum but they advertise and educate.

Hope that is not see as snarky.
