

Random

Random is a library with utilities to generate random data.

Functions

[randomUInt8](#)

Generate a random uint8 number.

Output:

- value
- (uint8
-): Is the random number.

[randomUInt16](#)

Generate a random uint16 number.

Output:

- value
- (uint16
-): Is the random number.

[randomUInt32](#)

Generate a random uint32 number.

Output:

- value
- (uint32
-): Is the random number.

[randomUInt64](#)

Generate a random uint64 number.

Output:

- value
- (uint64
-): Is the random number.

[randomUInt128](#)

Generate a random uint128 number.

Output:

- value
- (uint128
-): Is the random number.

[randomUInt256](#)

Generate a random uint256 number.

Output:

- value
- (uint256
-): Is the random number. [Edit this page](#) [Previous Context](#) [Next Suapp](#)
