

Faucet

```
(()=>{var s=(i,t)=>{let a=async()=>{await(await i())};if(t.value){let e=matchMedia(t.value);e.matches?  
a():e.addEventListener("change",a,{once:!0})}};(self.Astro||(self.Astro={})).media=s;window.dispatchEvent(new  
Event("astro:media"));})();
```

On This Page

- [Sepolia Faucets](#)
- [Scroll Sepolia Faucets](#) To interact with our testnet, you first need to receive testnet ETH on Sepolia Testnet . Then you may bridge from Sepolia Testnet to Scroll Sepolia Testnet .

Sepolia Faucets

Each faucet has its own rules and requirements, so you may need to try a few before you find one that works for you.

Here are a few Sepolia faucet apps:

- <https://sepoliafaucet.com>
- <https://sepolia-faucet.pk910.de>
- <https://faucet.quicknode.com/drip>
- <https://faucet.chainstack.com>
- <https://infura.io/faucet/sepolia>

Once you receive ETH on Sepolia, you should see it in your wallet on the Sepolia Network . It may take a few seconds for them to appear, but you can check the status by looking for a transaction to your address on a [Sepolia Block Explorer](#) .

Pace Yourself!

Most faucets only allow requests for test tokens once every 24 hours.

Scroll Sepolia Faucets

If you don't want to interact with the bridge, some faucets directly distribute Scroll Sepolia ETH.
