Multi-EGG is:

1. A 3mo grant request to complete all three of the GOOSE goals approved by the DAO earlier this year, namely deployment of dual governance and permissionless CSM whitelisting, maintaining rollout and node operator onboarding for Simple DVT and CSM modules
2. A 6mo grant continuity request for Ecosystem growth

3. A 12mo grant continuity request for the Bug Bounty program

Continuity for ongoing projects being outsourced to Pool Maintenance Labs Ltd., Argo Technology Consulting Ltd. or serviced by RCC, to collect functions relating to protocol execution, sponsorships and development support for the DAO. These existing contributor channels can mitigate present business continuity risks while advancing decentralised protocol governance.

This proposal would ratify the below budget request that will continue grantee funding through EasyTrack contracts into three multi-signature addresses

DAI 11.1m will be approved for the period Jan-2025 to Mar-2025, distributed across the below grant approvals.

Multisig signers & addresses may be rotated by specified multisig after signalling the change to DAO on the governance forum. Number of signers can't be lowered, and the threshold must be at least 50% of the signers.

A further 8.5m DAI would be approved for Ecosystem growth to continue a previous[grant](#) to further liquidity incentivization, experimentation and research through to 2025-06-30.

A further 2m DAI would be approved for continuing coverage for exposure to the[Bug Bounty](#) program through to 2025-12-31. These funds will only be drawn in the event of a payout event.

At the end of the budget period, contributors will request new grant funding to propose advancing towards[GOOSE-2](#).

Transparency

As with the previous EGG, a review will be held to recap on the progress to date and report on variances. Publicly available information on the state of the DAO economics continue to be available [here](#).
