

Setup guide

1. [Create a telegram test account](#)

1. Add a username to your test account

1. Install dependencies

...

Copy npm install @argent/tma-wallet starknet

...

[@argent/tma-wallet](#) is the Telegram wallet library.

[starknet.js](#) is used to interact with Starknet.

1. Create a Telegram Bot

Start a chat with [@BotFather](#) .

Prompt/newbot and follow the instructions.

1. Create a Telegram mini-app

Run/newapp and follow the instructions.

You'll be asked by BotFather to send a webapp url. You can either send anything and change it later or complete this after deploying your webapp.
