

Title: [ARFC] ACI Service Provider 6-month Proposal

Author: [@marczeller](#) - Aave Chan Initiative

Date: 2023-03-29

Summary:

This ARFC introduces the Aave Chan Initiative Service Provider 6-Month Budget Proposal, following [the successful TEMP CHECK](#) via [snapshot vote](#). The proposal aims to allocate funds to the Aave Chan Initiative (ACI) treasury for the next six months, enabling us to actively engage in the Aave ecosystem and contribute to its growth and improvement.

Abstract:

if this proposal were to be approved by governance, a stream of the allocated budget would be started to the ACI treasury wallet. It will be used to cover various aspects of the ACI's involvement in the Aave community, including team compensation, community engagement, research and development, infrastructure costs & tooling subscriptions, marketing, and communications.

Motivation:

The Aave Chan Initiative has been a dedicated contributor to the Aave ecosystem. The 6-Month Budget Proposal aims to secure the necessary resources to continue the ACI's work, ensuring that we can maintain our level of commitment and contribution to the Aave ecosystem. For more details about the ACI proposal, please refer to the [TEMP CHECK version of the current proposal](#)

Specification:

If this proposal is approved, a stream of the allocated budget will be activated, with `treasury.aavechan.eth`

(`0x57ab7ee15cE5ECacB1aB84EE42D5A9d0d8112922`) as the recipient. This will allow the ACI to periodically claim a fraction of the budget for the duration of the stream.

In terms of technical implementation, the AIP will call the `createStream()`

method of the `IAaveEcosystemReserveController`

interface to create a 180-day stream of 250,000 aUSDT.

Disclaimer:

The Aave Chan Initiative is an independent organization focused on contributing to the Aave ecosystem. This proposal was not commissioned or paid for by any third party.
