

Bounties

Learn how Relay rewards developers who find & report vulnerabilities.

We at Relay are committed to maintaining the highest security standards for our protocol and smart contracts. That's why we are launching a bug bounty program for those who help us identify vulnerabilities in the Relay Protocol. With our bounty, we hope to incentivize ethical hackers to discover and report vulnerabilities in our contracts and protocol.

Rewards will be dependent on the severity of the bug. We always provide monetary rewards for bug that fall under these categories:

- Extract value from the solver
- Exploiting our smart contracts in an unintended way that results in a loss of funds

To be eligible for the monetary rewards, this bug must be investigated and confirmed by our team. Monetary reward amounts are 10% of the value at risk, with a maximum reward capped at 100,000 USD. "Value at risk" is defined as the total value that could be extracted within a 10 minute period. This is because our product has automatic circuit breakers and alarms that would prevent losses that take longer to extract.

If you suspect you've encountered a bug, please reach out directly by email support@relay.link . We review all reports closely with the team. We will get back to you within 1 to 4 days regarding the next steps. Most responses are provided within 24 hours, barring holidays and weekends.
