

1Balance

Gelato's unified multi-chain payments system

Overview

When you use each of Gelato's services there are two costs that you need to pay:

- Gas costs
- of your executed transactions (or those of your end users if you are sponsoring them)
- Service fees
- - Gelato subscriptions or % premiums on the gas costs of each transaction
-

1Balance makes it easy for you to pay all of your costs across all the networks that you are using from one single easy-to-manage balance.

Supported Gelato Services

[Relay](#) and Web3 Functions are currently integrated with 1Balance.

Getting Started

To get started with 1Balance on mainnets you will need USDC on Polygon (plus some MATIC to cover Polygon gas costs for depositing). We will be extending 1Balance support to other networks.

We now support both the bridged version of USDC, known as USDC.e, and the native USDC token. It's important to ensure you are using the correct USDC token by verifying the contract address. For your convenience, here are the contract addresses on Polygon:

- USDC Contract Address
- [:0x3c499c542cef5e3811e1192ce70d8cc03d5c3359](#)
- USDC.e Contract Address
- [:0x2791Bca1f2de4661ED88A30C99A7a9449Aa84174](#) *
- [Access the 1Balance in the Gelato app](#)
- Connect your wallet if you have not already done so
- Switch to Polygon
- Click on deposit and then approve USDC into your 1Balance
- After confirming your deposit transaction in your wallet you will see a Pending deposit appear in your deposits history:
-

Once the required number of confirmations has been reached your deposit will be credited and your 1Balance is ready for use.

1Balance does not yet support withdrawals - this feature will be added soon. Please select your deposit amount accordingly.

Fees

More details on the fees applied by each service are available:

- [Relay Fees](#)
- and more [detailed guide](#)
- to using 1Balance with Relay
- [Web3 Function Fees](#)
-

Low Balance Alerts

To ensure that your transactions execute as you expect, it is critical that you have sufficient funds deposited in 1Balance. To help you monitor your balance and receive alerts when it drops below your preferred threshold, we provide a [1Balance Alerts service](#).
