It's update time, and we're excited to share where we are and where we're heading.

Where We Stand

The Brokk journey took us from THORChain to Terra, and even through a rocky patch with Avalanche. Each step, with its bumps and turns, has been a learning curve, helping us grow. Despite the shifts and shakes, we're still here, still building.

Team and Treasure

From 19, we're now a team of 8, steering a solid treasury of \$1.5M, which gives us a runway for 20+ months.

We're putting unused funds into BTC, RUNE, and a few other bluechips to ensure we stay strong and stable for the adventures ahead.

Product

DCA, yield strategies, and indexes are up and rolling, and accessible through our freshly released SDK. And we will continue iterating, ensuring Brokk becomes the go-to DeFi asset manager.
