

Through a REST API Endpoint

The service allows users to easily query for recent price updates via a REST API.

Our REST Endpoints can be found in this [Section](#).

Get Latest Price on Standard Price Reference

Method :GET

Path :/oracle/v1/request_prices

Parameters :?ask_count={askCount}&min_count={minCount}&symbols={symbol-1}&symbols={symbol-2}&...&symbols={symbols-n}

```
curl -X GET " {REST_API} /oracle/v1/request_prices?symbols=BTC&symbols=ETH&ask_count=4&min_count=3" {  
"price_results" :
```

```
[ { "symbol" :
```

```
"BTC" , "multiplier" :
```

```
"100" , "px" :
```

```
"4822795" , "request_id" :
```

```
"235866" , "resolve_time" :
```

```
"1631766659" } , { "symbol" :
```

```
"ETH" , "multiplier" :
```

```
"100" , "px" :
```

```
"303321" , "request_id" :
```

```
"245820" , "resolve_time" :
```

```
"1632163802" } ] } For more usage example of our REST API, can be found in Band CLI and REST Endpoints Section.
