## Querying Proposals

### Query Using Proposal ID

Once created, you can now query information of the proposal:

...

Copy secretcliquerygovproposal

...

...

Copy

## Output of querying for a proposal

content: '@type':/cosmos.gov.v1beta1.TextProposal description:"A description with line breaks \n andcodeformatting" title:MyCoolProposal deposit\_end\_time:"2022-06-28T14:16:06.110227079Z" final\_tally\_result: abstain:"0" "no":"0" no\_with\_veto:"0" "yes":"0" proposal\_id:"14" status:PROPOSAL\_STATUS\_REJECTED submit\_time:"2022-06-28T13:16:06.110227079Z" total\_deposit: -amount:"100000000" denom:uscr voting\_end\_time:"2022-06-28T14:16:06.110227079Z" voting\_start\_time:"2022-06-28T13:16:06.110227079Z"

...

### Query For All Proposals

You can query for all available proposals using:

...

Copy secretcliquerygovproposals

...

### Query For Proposal Depositor

You can query for the proposal depositor using:

...

Copy secretcliquerygovdeposit\ [proposal-id] \ [depositer-addr] \ [flags]

...

### Query For Proposal Depositors

You can query for the proposal depositors using:

...

Copy secretcliquerygovdeposits\ [proposal-id] \ [flags]

...

## Query For Proposal Voter

You can query for the proposal voter using:

...

Copy `secretcli query gov vote \ [proposal-id] \ [voter-addr] \ [flags]`

...

## Query for Proposal Proposer

To query for the proposer of a given governance proposal use:

...

Copy `secretcli query gov proposer [proposal-id] \ [flags]`

...

## Query Proposal Tally Results

To check the current tally of a given proposal you can use the `tally` command:

...

Copy `secretcli query gov tally [proposal-id] \ [flags]`

...

## Query Governance Proposals

To check the current governance parameters run:

...

Copy `secretcli query gov params`

...

...

Copy `deposit_params: max_deposit_period:"3600000000000" min_deposit: -amount:"10000000" denom:usrt tally_params: quorum:"0.334000000000000000" threshold:"0.500000000000000000" veto_threshold:"0.334000000000000000" voting_params: voting_period:"36000000000000"`

...

## Querying Subsets of Governance Proposals

### Voting

To query subsets of the governance parameters for voting run:

...

Copy `secretcli query gov param voting`

...

...

Copy `voting_period:"36000000000000"`

...

### Tallying

To query subsets of the governance parameters for tallying run:

...

Copy `secretcli query gov param tallying`

...

...

Copy quorum:"0.334000000000000000" threshold:"0.500000000000000000" veto\_threshold:"0.334000000000000000"

...

## Deposit

To query subsets of the deposit governance parameters for voting run:

...

Copy secrecliquerygovparamdeposit

...

...

Copy max\_deposit\_period:"3600000000000" min\_deposit: -amount:"10000000" denom:uscr

...
