

I am referring to this grant [dYdX Grant: Long-Tail Market Making on dYdX](#)

It's insane \$2.5k per market. Raven Dao is paid ~70k a month

Most of these markets are generating less in fees than paid to a market maker.

If you check for some of the markets like 60% volume is between Xenophon Labs deployed vaults(\$50k for service and \$200k LP) and Raven DAO.

In my opinion it's insane overpayment
