

# **SHIELDED VOTING FOR ALL ELECTIONS**

## **TEAM DESCRIPTION:**

[@furiousanger](#) - DAO member.

[@br00no](#) - DAO member.

## **PROPOSAL DESCRIPTION:**

Snapshot allows shielded voting. This means during the voting period users choices and results are kept private until the vote concludes. We should implement this approach for all elections and voting defined under clarification of scope

## **BENEFIT TO APECOIN ECOSYSTEM:**

Current live vote results may influence participants and voters. By shielding the vote we remove this factor.

## **STEPS TO IMPLEMENT:**

Apply shielding option on snapshot for all elections and voting defined under clarification of scope

## **OVERALL COST:**

ZERO.

## **CLARIFICATION OF SCOPE:**

This change covers all elections and the entire election process.

This change covers all selections (which may or may not be the result of an RFP), and the entire selection process.

This change will not apply to AIP voting.

(This change includes all elections and selections and their related prior processes where applicable voting occurs. This change excludes all AIP voting.

)
