

Hello dear All,

It is my second proposition. [The first was to add/link to aave deposits a credit card](#) Please stay indulgent if I still propose something stupid.

I would like to find on aave a feature that allow me

- to buy on MATIC MAINET every Day/week/month some AAVE token (Or anything else) with my credit card or by a transfer (By a system of on-ramp). This feature is called DCA (Dollar Cost average)
- those token will
- put in common in first time
- and in a second time bridge to ETH mainet with a system a of Oven ( as <https://www.piedao.org/> does ) that allow to minimise the cost of bridging for everybody.

3 advantages for AAVE:

- News potential users
- Fees collect
- TVL increasing
