

Hi all!

As alot of you may have noticed, when spinning up a fullnode it can take around 3-4hours to completely sync the chain.

Chain of Secrets team has taken on the task to help the community out with offering a Quicksync service, the latest quicksync is available at <http://quicksync.chainofsecrets.org/enigma-1-block992500.tar.lz4>

We will publish compressed & complete sync's at different block intervals. The current quicksync is 6.7GB which we have compressed to 3.9GB.

Here are the steps to use it when setting up a new fullnode

This will save you 3-4hours of wait time

Install lz4

```
sudo apt-get update -y
```

```
sudo apt-get install wget liblz4-tool -y
```

Download & Decompress Quicksync Data after installing Enigmad & Enigmacli

```
cd ~/.enigmad/
```

```
wget http://quicksync.chainofsecrets.org/enigma-1-block992500.tar.lz4
```

```
lz4 -d enigma-1-block992500.tar.lz4 | tar xf -
```

Please note, that you may have a short time to catchup to latest block, but this will be minutes not hours.
