

Following the Shockwave Delta upgrade that was applied on September 21 (Proposal #110

), we found a bug that affects sending SNIP20 tokens over IBC.

There's no risk for funds, consensus or privacy.

- After a quick poll with the validators, we decided to do a small chain upgrade to fix the bug.
- Later today we'll post an on-chain upgrade proposal, targeting the mainnet upgrade time to be Wednesday, October 12, 2022 at 2:00PM UTC
- The pulsar-2 testnet will be upgrade ahead of the mainnet upgrade, most likely on Thursday, October 6, 2022 at 2:00PM UTC.

LocalSecret release candidate:

```
docker run -it --rm -p 9091:9091 -p 26657:26657 -p 1317:1317 -p 5000:5000 \ --name localsecret  
ghcr.io/scrtlabs/localsecret:v1.5.0-beta.2
```

Bug fix:

[github.com/scrtlabs/SecretNetwork](https://github.com/scrtlabs/SecretNetwork)

### **Fix secret message parsing when message is plaintext in IBC**

scrtlabs:master

← scrtlabs:fix-ibc-submsg

opened 12:56PM - 22 Sep 22 UTC
