

Hi, Arbitrum community

I'm Sebix, the head of Atoma—a team dedicated to fostering growth and community engagement among Spanish-speaking audiences. Additionally, I currently serve as a member of MakerDAO's GovAlpha Core Unit and have been leading MakerDAO's Ambassador Program in the Latin American region for the past two years.

Our team has just joined the Arbitrum Protocol, with high expectations and a strong desire to contribute. We want to formally greet the community and introduce ourselves to all of you.

We are thrilled to have the chance to share our experience with you and collaborate with Arbitrum during this crucial time of the DAO's inception and the establishment of an active and healthy community. Soon, we will be posting a formal presentation and proposal on the Arbitrum Forum to receive feedback from the community members and align our contributions with the goals of the DAO.

It's a pleasure to meet you all :).

The Atoma Team
