

rewardsPPM()

...

```
Copy function rewardsPPM()externalviewreturns(uint32);
```

...

This function returns the rewards incentive in PPM the caller will receive from calling the `execute()` function.

Example

...

Copy // Returns: [20000, //portion in PPM]

...

For the ETH token, use the contract address:0xEeeeeEeeeEeEeeEeEeEeeeeEeeeeeeeEEeE [Previous](#)
