

# Configure in Dashboard

## Configure supported Chains and Networks

In your developer dashboard, you can toggle on the chains that you currently support. Whether it is Ethereum, Polygon, Optimism or other EVM based chains or Solana and Flow. Simply save the settings, and refresh your page with the SDK. You're good to go.

Simply go to the [configurations page](#) in your dashboard and flip the toggle. We currently support the following chains:

1. EVM:
2.
  - Ethereum
3.
  - Polygon
4.
  - Arbitrum
5.
  - Optimism
6.
  - Palm
7.
  - Aurora
8.
  - BNB Smart Chain
9.
  - Gnosis
10.
  - Base
11.
  - Avalanche C chain
12.
  - Celo
13.
  - Chiliz
14.
  - Fantom
15. Solana
16. Bitcoin
17. Flow
18. StarkNet
19. Cosmos

## Custom EVM Chains

If you want to specify networks not listed above, you can manually define your network in the SDK props. See the guide [here](#).
